SKILLS

Business Analysis, KPI Reporting, Dashboard Development, Business Requirements Gathering, Stakeholder Management, SQL, Power BI, DAX, Power Query, Tableau, Python, Advanced Excel, Reporting Automation, Data Validation, Variance Analysis

WORK EXPERIENCE

1) Senior Analyst – Platform Solutions Group | Oxane Partners | Mar 2025 – Feb 2026

- Managed structured finance portfolio reporting workflows, ensuring timely delivery of recurring client and management reports.
- Translated business requirements into SQL datasets, reporting logic and dashboard solutions for performance monitoring and decision support.
- Developed and enhanced Power BI dashboards tracking portfolio performance, operational KPIs and credit-related metrics.
- Built macroeconomic monitoring dashboards incorporating U.S. economic indicators to support portfolio risk assessment.
- Performed data validation, reconciliation and quality assurance checks to ensure reporting accuracy and consistency.
- Automated recurring reporting processes using SQL and Excel VBA, improving reporting efficiency and reducing manual effort.
- Collaborated with Project Management, Finance and Data/UI teams to resolve reporting gaps, data inconsistencies and technical feasibility issues.
- Standardized KPI definitions and reporting structures to improve reporting consistency and stakeholder visibility.

2) Financial Analyst – Credit & Investment Reporting | Apollo Global Management | May 2023 – Aug 2024

- Delivered monthly and quarterly portfolio reporting cycles, ensuring timely and accurate reporting of investment performance metrics.
- Extracted and structured financial datasets using SQL and Excel to support reporting automation and operational analysis.

- Conducted variance analysis on portfolio performance, cash flows and valuation movements, highlighting key business drivers.
- Performed reconciliation and data validation across multiple reporting systems to ensure data integrity.
- Developed KPI dashboards and reporting frameworks in Power BI, improving visibility into portfolio performance and operational trends.
- Collaborated with finance, investment, operations and audit stakeholders to align reporting requirements and delivery timelines.
- Contributed to reporting process improvements and standardization across recurring reporting workflows.

KEY PROJECTS

1) Stability Index Framework

- Designed a multi-dimensional country stability framework covering economic, governance, social, climate resilience and hard power indicators.
- Analyzed 15 countries across 30+ indicators using normalization, weighted scoring and comparative benchmarking methodologies.
- Developed interactive dashboards to identify long-term structural strengths, vulnerabilities and stability trends.

2) AI Resume & Job Description Matcher

- Built an AI-assisted application to compare resumes against job descriptions and identify skill gaps.
- Automated keyword extraction, resume matching and job-fit scoring to support application prioritisation.
- Developed an interactive interface for evaluating resume relevance against target roles.

3) Strait of Hormuz Economic Impact Dashboard

- Developed a scenario-analysis dashboard assessing the potential impact of a Strait of Hormuz disruption on major oil importing economies.
- Modelled the impact on crude oil prices, inflation, exchange rates, current account deficits and key macroeconomic indicators.
- Built interactive KPI dashboards to support business decision-making.

EDUCATION

MBA Financial Services – KJ Somaiya Institute of Management (2023)

B.Tech Computer Science & Engineering – The NorthCap University (2020)
